

The classic from TECE.

TECEambia plastic

TECEambia push plates, with their single or dual flush system, are the universal plastic standard. Available in numerous variations, their compact dimensions fit harmoniously in every bathroom environment. Double-sided rubber buffers reliably prevent rattling noises.

In the antibacterial version of TECEambia, the growth of germs on the surface is inhibited by silver ions – ideal for public sanitary areas.

* Also available with antibacterial action

- All plates can be used for front or top actuation
- The timeless neutral shape is suitable for every bathroom mood
- Trendy small dimensions
- Double-sided rubber buffers prevent unpleasant rattling noises
- Robust actuation mechanism
